Water and Sewer Rate Increase

The WOW Board has voted to Increase the Monthly Water and Sewer Rate from \$68 per month to \$76 per month effective January, 2011. This was approved at the December 2010 Board meeting. The Board has worked hard to keep expenses down and not increase rates, however, expenses like the plant's electric bill, have been increasing every year. Our electric bill alone has gone from \$12,500 per year to over \$17,000 in 2010. We have seen similar increases in chemicals, sludge hauling, labor, legal, etc. This along with a decrease in other revenue, such as your Property Valuation (which reduces the amount we receive via the Mill Levy), Specific Ownership fees (which is the amount we receive from your car license tags), and the interest the District receives on it's reserves has resulted in the District having a shortfall this and next year.

The next WOW Board Meeting will be on Thursday, January 13th at 6:30 p.m.

The meetings are held in the plant at the end of Wisp Creek Drive.
